Carpets & Underlay

- 15 YEAR WEAR
- 15 YEAR STAIN RESISTANCE
- 15 YEAR COLOUR FAST
- LIFE TIME ANTI STATIC

+10 YEARS IF INSTALLED ON DUNLOP ULTRAPET UNDERLAY

The Carpet

A true testament of versatility and endurance, UltraPet carpets are designed to create the perfect environment for both you and your furry friends!

Made from cutting edge technology, UltraPet carpets are able to withstand the hustle and bustle of both paws and feet; the increased durability and stain repellent properties that they provide mean there's no longer any need to restrict your beloved fur babies from entering all rooms in your home!

Cold water can easily clean most stains and pet accidents (such as urine and faeces) in the wag of a tail, giving you peace of mind as you navigate through the other stresses of looking after your boisterous pup or spirited cat.

The Underlay

UltraPet carpet underlay is specially formulated to provide superior comfort underfoot and outstanding durability.

It also features StainShield, an innovative new multilayered high-density polyethylene barrier that helps to protect against most common household spills and pet stains. UltraPet is also treated with a proven antimicrobial which helps to prevent against odours whilst providing hygienic freshness for your home.

UltraPet Carpets Colour Options

UltraPet carpets come in a range of ten beautiful colours thoughtfully selected to harmonise with diverse interior design styles. So, whether you prefer the grounded colour palette of browns and neutrals or monochromatic charcoals and greys, we've got you covered in 3 different weights.

Also, while with some carpets the colour is only visible on the yarn surface, much like a radish, UltraPet carpets have colour built inherently into the yarn fibres, just like a carrot. This means your UltraPet carpet will maintain its colour for years to come.

Birman

Birman is a budget friendly carpet range that achieves a look of luxury without compromising on its resilience. A perfect choice for kid's bedrooms where all the splotches and splashes take place.

Basenji

Basenji strikes a perfect balance between durability and comfort. This carpet is an ideal choice for rooms that you want to add a little bit of richness to, such as the bedroom or living room.

Akita

Akita is an undeniably lush and attractive twist pile constructed with innovative technology to provide you with ultra-soft comfort underfoot. This denser, heavy weight range offers maximum durability and resilience against the wear and tear of an active household.

UltraPet Carpet Introduction

Your carpet will give you years of hard-wearing service if you care for it and maintain it on a regular basis. This document details how to best care for your carpet.

Please read these instructions carefully.

What you need to do

To enjoy the protection of our warranties, it will help if you take these few simple steps:

1. Please retain your receipt of purchase together with this booklet in a safe place.
2. Please retain a portion approx. 18 x 18 cm of excess, unused carpet after installation.
3. Have your carpet cleaned in accordance with the care and maintenance instructions contained in this booklet and have it professionally cleaned once every 12-18 months starting from the date of purchase.
4. Keep all receipts of professional cleaning and, also keep a list of all products used to clean and maintain your carpet.

Regular Maintenance

We highly recommend, before vacuuming your newly installed carpet, that you vacuum an offcut piece of carpet to ensure your current vacuum cleaner will not agitate the fibres and cause unnecessary fuzziness.

Frequent vacuuming removes soil particles from the surface before they work their way below the pile surface. It is recommended to vacuum at least once a week and more for heavy traffic areas. It is recommended to use either upright vacuums or quality barrel vacuums with adjustable brush heads. Extra care must be taken in heavy traffic areas, including entrance areas.

You can use an adjustable regular-suction, turbo or a power brush head for your cut pile carpet; however, excessive use of rotating brush head may disturb the overall appearance of your carpet. We recommend using an adjustable regular-suction head and occasionally vacuuming with your turbo or power brush head.

Periodic Maintenance

However meticulously both regular and interim maintenance are carried out, the time will come when the carpeting will require a thorough, deep or restorative clean. Carpet should be professionally steam-cleaned (hot water extraction) every 12-18 months. Steam cleaning should be carried out by a reputable professional steam cleaner and in accordance with the Australian and New Zealand carpet cleaning and maintenance standard AS/NZS3733-1995.

Do-it-yourself steam cleaning, shampooing or dry cleaning is not recommended.

Additional steps to protect your carpet and keep it looking better for longer:

- Use furniture cups or felt pads under furniture.
- Place mats at exterior entrances to capture dirt, grit and moisture from footwear.
- Place rugs/mats or carpet protectors in areas that receive a lot of traffic or regular pressure (i.e. in front of couches, beside beds) to protect against uneven wear. Ensure you keep rugs/mats or carpet protectors clean and vacuum the carpet pile underneath.
- In areas subject to prolonged exposure to direct sunlight, protect your carpet with curtains, blinds or awnings.

Spot Cleaning Procedures

Immediately remove as much of the spill as possible. To remove stains, it is generally best to use general carpet cleaning liquids designed specifically for spot cleaning. The recurrence of stains after spot cleaning is not uncommon for a concentrated spill, so a repeat treatment is necessary.

Never rub or scrub the carpet as it may cause fuzzing or change the appearance of the carpet.

Always work from the outside of the stain towards the middle to avoid further spreading.

It is recommended to pre-test any cleaning agents on a small obscured area of your carpet to ensure they do not affect the appearance or colour of the carpet.

It is most important to rinse the cleaned area thoroughly with water and blot dry after removing any spills. If the cleaned area is not sufficiently rinsed, a sticky detergent residue remains which attracts soiling.

Spills should be attended to as they occur - the older the stain, the more difficult it is to remove.

Dry Stains

Gently remove as much of the substance as possible using a small soft hand brush or spatula to break up any crusted material and then vacuum thoroughly.

Wet Stains

Blot with absorbent white cloth or paper towel, or use a spatula to remove any excess, then blot. For larger spills, a portable extraction unit or wet/dry vacuum, or professional cleaning is best.

Your 100% UltraPet carpet will clean most stains with just water. With the help of a sponge or sprayer, apply clean water on the stained area. Blot up with a sponge or a wet/dry vacuum cleaner to remove excess water. Repeat these steps 4-5 times or until the stain is completely removed from the carpet. Once the stain is completely removed, blot dry with paper towel or cloth. Do not walk on the carpet until it is completely dry.

If you prefer to use household cleaning agents to maintain your carpet, we suggest you follow the cleaning methods outlined in this booklet.

Recommended Cleaning Methods

Rinse the cleaned area thoroughly with clear cold water after each cleaning step and blot dry.

Detergent

Use commercially available general carpet cleaning or spot removal detergent. Apply detergent sparingly to the stained area then blot to remove residue and rinse thoroughly with clear water. Blot dry.

Ammonia solution

Mix one tablespoon of non-bleaching household ammonia with one cup of warm water.

(Note: Do not mix with chlorine bleach.) Gently apply ammonia solution sparingly. Blot the stained area to remove the substance. Rinse thoroughly with clear water. Blot dry.

Vinegar solution

Mix one-part white vinegar and one-part water. Apply the white vinegar solution to the entire area that has been cleaned. Rinse thoroughly with clear water. Blot dry.

Alcohol

Clear alcohol; use as is. Apply only enough alcohol to dampen the stain. Blot dry. Repeat as long as the stain continues to transfer.

Clear water

Rinse the cleaned area thoroughly with clear water and blot dry.

If stains fail to respond to treatments, contact a professional carpet cleaner immediately.

UltraPet Cleaning Table

Stain	Step 1	Step 2	Step 3	Step 4
Asphalt	Alcohol	Detergent	Vinegar solution	Clear water

Characteristics Of Carpet

The below are common characteristics of broadloom carpet and are not considered manufacturing faults.

Appearance Retention

Carpets are a textile, and the appearance will change over time due to – but not limited to – foot traffic. The pile of the carpet will flatten particularly in high foot traffic area as well as under heavy furniture. This occurs in all tufted carpet and is not considered a manufacturing fault.

Tracking

Tracking is the visible footprints and indents in the carpet. Tracking is more pronounced in carpets that have a higher pile and or softer yarn. This can be reduced by regular vacuuming.

Colour Variation

Installed carpet will show a colour variation from the in-store sample. We recommend, where possible, that all the carpet in your home is from the same dye-lot / production to avoid batch to batch colour variations.

Fading

Carpets are a textile product and will experience colour loss over time when exposed to direct sunlight. The use of curtains, blinds and other window coverings is recommended to protect your carpet from prolonged exposure to direct sunlight.

Pile Reversal / Shading:

Irregularly shaped lighter and darker patches appearing on cut pile carpets are known as shading, puddling or watermarking. Areas of disturbed pile that reflect light in a contrasting way to the body of carpet surrounding it is caused by permanent pile reversal shading. This phenomenon is permanent and cannot be removed by brushing or vacuuming. While it remains unclear why permanent pile reversal shading occurs, it is not perceived as a manufacturing fault or is detrimental to the durability of the carpet. So far, it is an unexplained industry phenomenon.

Pattern Match / Bowing & Skewing

Slight variations between the length and width directions of loop piles are the result of stress and pressure differences during the manufacturing process. Consequently, the pattern running along the length of the carpet may not exactly match that running across its width. This is more likely to occur in large areas or situations where the carpet has been sourced from more than one production run.

Special care needs to be taken during installation, but even then, some irregularities may be visible, especially when viewing across multiple width installations. An experienced installer who is familiar with pattern matching can usually minimise the effect of any pattern variations and achieve a visually acceptable result.

Shift Lines

Parallel lines appearing at regular intervals on the surface of loop pile carpets are known as shift lines. These are more evident on carpets with large designs or more elaborate patterns; however, they are not visually intrusive or considered a manufacturing defect.

Correct and regular maintenance will increase the life span of a carpet and help maintain its good appearance. Cleaning should be proportional to the amount of soiling the carpet is subject to – the more dirt deposited on the carpet, the more intensive the maintenance program required.

**Carpet and
 Underlay for
 the *whole*
 household.**

UltraPet Carpet Underlay

If your housemates are of the canine or feline variety, it's important that you keep them in mind when you are selecting your new floorcovering. At the end of the day we all know that accidents can happen!

Thankfully UltraPet Carpet Underlay is here to make your choice easier. This innovative new carpet underlay has been cleverly designed to protect against most common household spills and pet stains.

Added protection

UltraPet Carpet Underlay has been engineered to keep stains from soaking into the cushion thanks to its protective barrier, StainShield. This advanced technology allows for easier cleaning and less staining. In most cases, stains can be easily removed by spot cleaning.

 **STAINSHIELD**
 added protective barrier

Comfort that lasts

Specially formulated to provide superior comfort underfoot, UltraPet carpet underlay also provides outstanding durability, ensuring that your new carpet feels great and lasts longer! What's more, it's also treated with a proven antimicrobial that helps to prevent against nasty odours, providing hygienic freshness and a healthier home environment for you and your pets.

Australian made

Proudly Australian made, you can be confident that you've chosen a quality product that will last the test of time. Plus, it's guaranteed by Dunlop for the life of your carpet.

After all...

it's what you can't see, that makes the difference!
